VIDEO2BRAINÂ .Q: No iPhone
SDK included in Xcode 4.0.2 It is
possible to downgrade to Xcode
4.0.1 because of a bug, but I need
to upgrade to Xcode 4.0.2 because
I want to use GDB and LLDB to
debug my application. If I try to do a
fresh install of Xcode 4.0.2, I get an
error message telling me that the
SDK isn't available. Is there any
way that I can get the SDK from
one of the older Macs that I have?
A: No. That's not an option. Q:
Binary to Hexadecimal conversion

I'm currently learning some computer science, and have stumbled upon a task to convert a binary number into a hexadecimal one. I already found a working algorithm for the binary to decimal conversion, but cannot get my head around how to do the other one.

Any hints would be highly appreciated. A: To convert any number to any other number you need two things: How much place does your number take, and how do you want to display it? If the number takes three digits, you just need to: Find the absolute value of the number. Do the following

operation to the number: Multiply number with two two's-complement. Add the result to one. If the number takes four digits, you need to do the same operation with two, three, and

four. Q: jquery toggle class and show/hide div I have two divs, the div that will be hidden by default is #myDiv1 and the div that will be shown by default is #myDiv2.

#myDiv1
