This is a long video, I know. This took me a few months to make. The reason being is because of two things. 1. The first time I encountered a Siren, and it took me about 8 months to record it. 2. The fact that it looks like I slowly improved at making videos over the course of its development. I know what you're thinking, "why didn't you include the game?" "Jealous?" I hear ya! I thought exactly the same thing when this mini-pack was first announced, and asked the question in an email to the Developer! Take a second to think about it this way, you really only need 3 games to create a full supporting cast!"We're not talking a big enough cross-section of games of different types here to give a full spread of their game play, but gamers have told us enough times that they're really excited to have all of the required building blocks pre-built for them, so they can just focus on how cool their latest builds are! I'm guessing those gamers are GEs fans! The minimum number of components to unlock this pack is 24 (10 ab, 7 ab, 7 bc, 2 bc). Not bad for a pack of just that, and three games! If you have the games they're meant for, it will unlock the whole thirty (!) new building pieces.

Cogs and Gates is an innovative puzzle game about overcoming the limitations of traditional thinking in order to solve the puzzle of how to make it out alive. While one must remain vigilant and remain aware, the game is not a difficult one to win. Why is that so? Why is the answer difficult to understand? Because one cannot escape from their mental limitations. With Cogs and Gates, one can! As one takes the role of either the cogs or the gates, one can open new doors that would not have otherwise been accessible. There may be one, or several, new doors that open, and one must choose which of the two routes to take. However, one cannot just open the door and then go for the exit. Rather, doors are locked by previous doors that were opened. The lock is closed, and so one must wait for it to open, that being the opposite direction of the way it has been closed. One cannot simply go on opening and opening doors, since there is always a choice to be made. That's where the puzzles of Cogs and Gates come in. By connecting gates, one can open a door to either an ally or an enemy in order to delay the other. By doing so, one
